Customers Aged Debt by Document Date Lookup

"With the Aged Debt by Document Date Lookup, you can display all your customers' debts from your Macola Progression or ES system, and all the customer information you need to chase them."

The information you need to chase the debts, such as customer phone numbers and contact names, is there ready for you to use. You can attach documents such as chaser letters and phone call notes, to produce a full contact history. Combine this Lookup with the appropriate Plugins, and this becomes a complete credit control facility. To make your life easier, all values can be presented in both the customer's currency and your home equivalent where needed.

- ✓ Quick and easy list of outstanding debts aged by document date, allowing you to see who owes what
- ✓ Easy sorting and selecting options, so you can present the information exactly how you want it
- ✓ Totals can be inserted where you need them: by currency, salesman, or anything else you choose
- ✓ All the information is available on-screen, so you can call the customer without having to print a report
- ✓ All details can easily be exported to Excel as an alternative to working from the screen
- ✓ As you call the customer, you can attach relevant documents, like chaser letters and call notes, to the customer's record
- ✓ Add Plugins such as Customer, Orders by Customer, and Customer Statement, and answer any of the customer's questions during the phone call

HyperLynq Aged Debt Lookup Benefits:

- ✓ Customers' debts are displayed in 5 aging periods:
 - under 30 days
 - 31 - 60 days
 - 61 - 90 days
 - 91 - 120 days
 - over 120 days.
- ✓ Save time spent chasing outstanding debts
- ✓ With all the information you need immediately to hand, you are more likely to get payment
- ✓ Easier to maintain firm control of credit, so less money is tied up in outstanding debt
- ✓ Reduce credit risk through better information
- ✓ Quickly see customers who have exceeded credit limits, so immediate corrective action can be taken to minimize risk
- ✓ Your customers will appreciate the speed at which you can answer their queries

Customers Aged Debt by Document Date Lookup Product Features:

- ✓ Works with Macola ES or Progression
- ✓ Displays live aged debt information in foreign and home currency
- ✓ Shows all relevant customer information needed for credit control

The screenshot shows the HyperLynq application window. The title bar reads 'HyperLynq' and the menu bar includes 'File', 'Edit', 'View', 'Tools', 'Help'. The main window displays a report titled 'Aged Debt by Document Date'. The report has a table with columns for 'Customer Name', 'Current', '30 Days', '60 Days', '90 Days', '120+ Days', 'Total', and 'Currency'. A red box highlights a section of the report data, which matches the table shown in the previous image. The report also includes a 'Grouped by' section with 'Customer Name' and 'Currency' selected.
