

HyperLynq Lookups: Customer Lookup

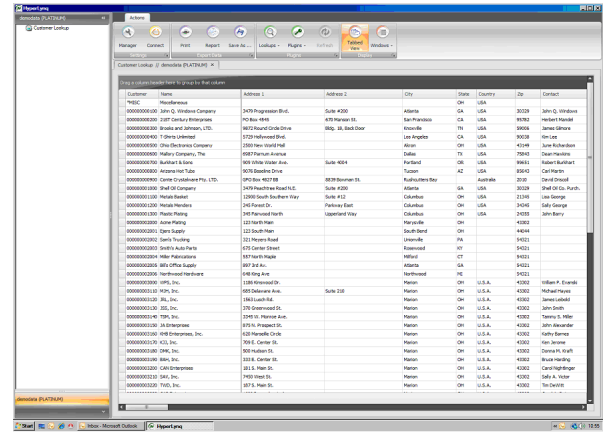

“With the HyperLynq Customer Lookup, you can see at a glance all the information held in your Macola Progression or ES customer file. You can quickly and easily turn it into a printed report, or send it to a data file such as Excel.”

Simple options allow you to select just the customers and fields you want to see, and to add totals or record counts etc. Layouts you created in HyperLynq can be stored for future use, and shared with other HyperLynq users. With the document attachment facility you can link files such as spreadsheets and word files to your customer record, and view them instantly in HyperLynq. And when you add HyperLynq Plugins, you can drill down from your customer records to open orders, past sales, and much more.

Ideas for Using the Customer Lookup

- Create simple formatted lists of customers
- Export customer details for mail merges
- Transfer customer data into Excel
- Check which customers are allocated to specific salesmen, and which remain unallocated
- Check the correct Tax Schedules and Codes have been allocated: by grouping on state and country
- Review customers' email addresses ready for electronic delivery of documents directly from Macola
- Store contracts, price lists, and other documents for each customer, providing easy access
- Quickly check which customers are due for a credit review

Customer Lookup

Customer Lookup Benefits:

- More accurate customer records because it is easy to review and identify problems
- Higher accuracy on transactions because information such as tax schedules and credit limits is more likely to be correct
- Easy transfer to Excel or Word for mail merging, saving you time formatting and cleaning data
- Fewer lost documents because they are attached to your customer record
- A quick and easy time-saving way for your team to find customer information and work with it

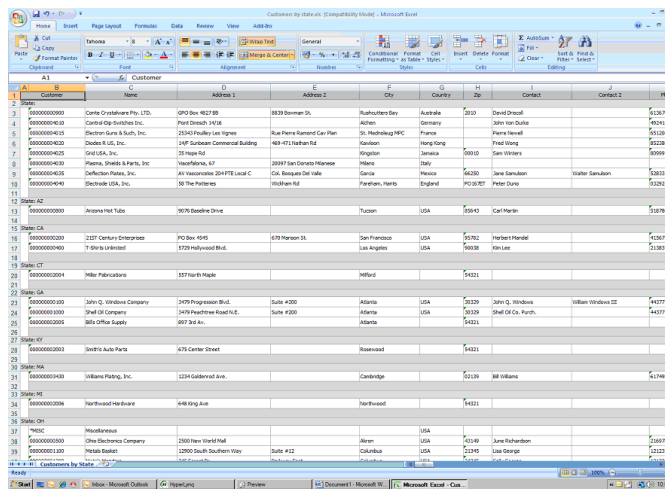

Customer Lookup Features

- Works with Macola ES or Progression
- Displays all the information held on your Customer file
- Sort records by clicking on the column heading
- Group records by multiple fields, by dragging the field to the grouping area
- Choose which fields you see
- Arrange the field order using drag and drop
- Click and select to insert totals and sub totals
- Select to filter customers, e.g. show only customers where the credit limit is zero
- Print reports of your customized on-screen data view
- Export your customized on-screen data view to Excel, PDF, HTML, Rich Text, Text, and more
- Email reports as Excel, PDF, and other attachment types
- Save your screen layout for future use
- Attach files to your customer records: these can be any type of data file stored on your computer
- Automatic links to any Plugin relevant to customer records and data
- Open multiple companies at the same time to compare data
- Open as many Lookups and Plugins at the same time as you wish
- Simple to install and distribute

HyperLynq Family Features

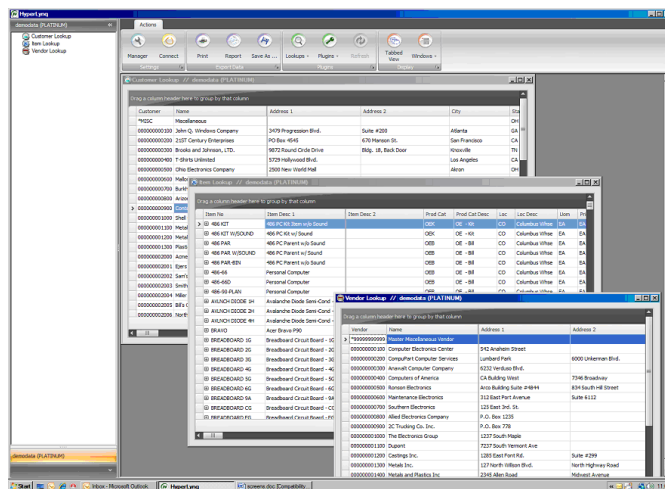

- Low cost rental means affordable access for all your users
- Easy to use without specialized report writing training
- Fully supported and updated by Lynq
- Tried and tested: we make sure you are getting the right data from the right places in Macola

- With System Manager, the shared foundation for all HyperLynq tools, distributing applications to your users is easy
- Users love it!
