

# HyperLynq Lookup

## Item Master with Accumulated Stock

**“With this Lookup, you can produce custom stock valuation reports, showing total stock rather than stock by location.”**

The Item Master Lookup allows you to see all the information held on your Exact Macola ES or Progression Item Master file. This includes total stock in hand, calculated average cost, etc., and quickly and easily turns it into useful reports.

With the Accumulated Stock Lookup, you can produce custom stock valuation reports, showing total stock rather than stock by location. With simple options, select just the items and fields you want to see, add totals and record counts, and store layouts you create for future use. With the document attachment facility, you can link any documents (e.g. spreadsheets, word files) to your item record and view them instantly.

The Lookup includes a drill down to show stock in hand by location. If you add Plugins, you can drill down from your item record to open purchase orders, open sales orders, bills of material, open manufacturing orders and much more.

- ✓ An analysis of stock in hand and stock valuations
- ✓ List items by product category, material cost type, tax, and more
- ✓ Produce custom stock valuation reports, showing total stock rather than stock by location (see Item Location/Item Master lookup for stock by location)
- ✓ Review standard costs by comparing with average and previous costs
- ✓ Review stock which hasn't moved in the past year, or any other period

## Lookup Benefits

- ✓ Maintain more accurate item records because it is easy to review and identify problems
- ✓ Better understanding of the stock you hold, ensuring you are not over or under stocked
- ✓ Achieve higher accuracy on transactions because information like tax schedules, material cost types, and product categories are more likely to be correct
- ✓ Easily identify incorrect data, e.g. minimum order quantities greater than annual usage
- ✓ The easy transfer to Excel saves your team time doing it other ways
- ✓ Reduce stock costs by reducing wastage, negotiating better pricing on the right things and minimizing duplication of items
- ✓ Fewer documents are lost or misplaced because they are attached to the item record
- ✓ Saves time by providing a quick and easy way for your team to find information and work with it

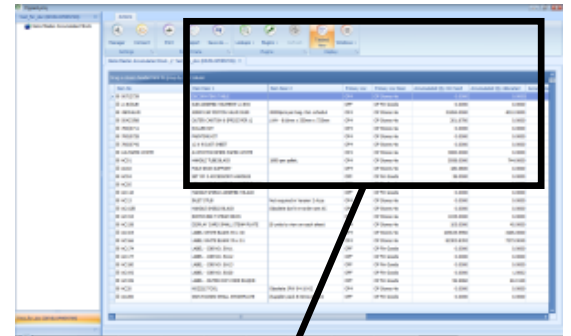

## Lookup Features

- ✓ Works with Macola ES or Progression
- ✓ Displays all information held on your Item Master file
- ✓ Sort records by just clicking on the column
- ✓ Group records by multiple fields by dragging the field to the grouping area
- ✓ Choose the fields you see
- ✓ Arrange the order of fields using drag and drop
- ✓ Insert totals and sub totals where you wish by clicking and selecting
- ✓ Select the Items to include e.g. show Items where the buyer is Jim Smith
- ✓ Print reports with your information shown on screen
- ✓ Export data as you have laid it out to Excel, PDF, HTML, Rich Text, Text and more
- ✓ Email any reports as Excel files, PDF and other attachments
- ✓ Store any layouts for future use
- ✓ Attach documents to your Item, e.g. Word files, spreadsheets, etc.
- ✓ Automatically links to any Plugin which can provide information about the selected Item
- ✓ Open multiple companies at the same time to compare data
- ✓ Open as many Lookups and Plugins at the same time as you wish
- ✓ Simple to install and distribute
- ✓ Export data to mail merge with word processing
- ✓ Store engineering drawings, inspection forms, change approvals and any other documents for each item, for quick and easy access

## HyperLynq Family Features

- ✓ Low cost rental means you can afford to give all your users access
- ✓ Quick payback through greater efficiency in stock holding and improved information
- ✓ Easy to use so you don't need reporting specialists
- ✓ Fully supported and updated by Lynq
- ✓ Tried and tested facilities. We make sure you are getting the right data from the correct places in Macola
- ✓ Common system manager makes it easy to distribute applications to your users
- ✓ Users love it!
